

Transformation on the Shopfloor

- >> international production expert
- >> ramp-up and transformation of productions
- >> leading operations and taskforce management
- >> automotive and plastics/metal processing

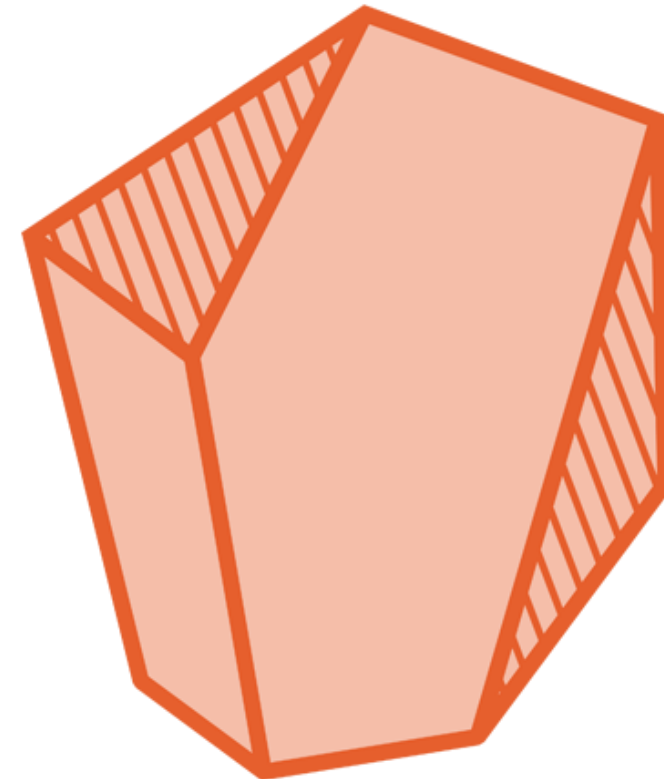

PROCESSES + PEOPLE >> successful Transformation

International interim production expert

With more than 15 years of experience in various production companies in Europe, I have acquired skills and methods, which will transform the operational area of companies.

My focus is on the Shopfloor of the automotive, plastics and metal processing industries and machine and process equipment industry. During my time as an interim manager, I was active in various task forces and critical projects.

My motto: „Doesn't work, doesn't exist!“

Experiences

Wide range of experience for transformation

Industries

- Automotive
- Plastics processing
- Metal processing

Success:

- Turnover increase by 55% in one year

Industrialisation of Process Equipment of exterior-Parts

Task

**Industrialization of Process Equipment;
Project is already after SOP
>> equipment not ready for series
production <<**

Client:

International automotive supplier (approx.
EUR 8.244 million / year, 31.000 employees)

Measures:

- Managing a team of experts from the various areas (painting, adhesive bonding, packaging, SCM, injection molding, assembling)
- Planning of capacity increase
- Procurement and implementation of additional equipment due to an increase in the number of units
- Integration of the project in the various production departments of the plant

Success:

- Production stop at the customer averted!
- Scrap rate reduced by 30%

Ramp-up of a production line for an automotive supplier

Task

Commissioning of a production line and optimization for series production within a few weeks

Client:

International automotive supplier, tier 2 (approx. EUR 350 million / year, 2.200 employees)

Measures:

- Documentation of all production disruptions
- Processing of all disruptions by using PDCA
- Creating and implementation of KPI-Boards
- Increasing the total output by optimizing the bottleneck
- Reporting to the Business Unit Manager
- Customer Care

Success:

- Scrap rate reduced by 35%
- Output increase of 50%

Statement

“With great competence and outstanding commitment, Mr. Sattlberger prepared and carried out the start of series production. The integration into the team and the project was quick and smooth. The collaboration was very good. I rate the engagement as very successful. ”

Business Unit Manager

International automotive supplier Tier 1

”

„Doesn't work, doesn't exist!“
